The gnu, antelope, zebra,  
small elephants, and  
giraffe are some of its  
prey.

# Consumer

**Cheetahs, leopards,  
and hyena, are other  
consumers.**

# 4 step food chain

Elephant grass-> elephant--> lion-> hyena

# Climate

Climate: The african savannah has 2 seasons, the wet and dry season. It is dry during the winter and wet during the summer.

\*It receives a total of **100 inches of rain** a year.

\*It has a temperature range from **68 to 86** degrees.

# Disturbances

There are scattered trees in the african savanna because of floods, fires, and low rainfall. The animals also eat the new tree shoots before they grow too large. Sometimes people set fire to the savanna to clear it for farmland.
