

Earn College Credit Without Sacrificing the High School Experience

“I loved being able to get the education of a college student while receiving the help of my high school teachers.”

—Alexandra K. 2021 BHS graduate, University of St. Thomas

At Buffalo High School, we outline a path for all students early in their high school career and help them plan for their future through a unique set of courses that align with the **Minnesota Transfer Curriculum (MnTC)**. This organized approach helps families make wise choices from the moment their student starts high school.

By partnering with both four-year colleges and two-year community and technical colleges, we have greatly expanded the number and variety of classes that align with the MnTC. Currently, more than 75% of BHS students qualify to choose from over 30 college-level, tuition-free classes, including career-focused subjects such as agriculture, business and technical education—without leaving the building!

The financial benefit is amazing. I’ll save a lot of money by only having to complete 2.5-3 years of college, with an estimated savings of \$20,000.”

—Conor L. 2021 BHS graduate, North Dakota State University

The MnTC is a planning tool for students that promotes a college-going climate and reduces their college debt. BHS teachers are trained and credentialed to teach these college courses, offering our students a supportive environment while they experience the rigor of college. Students can earn from 1 to 5 college credits per course that will transfer to any Minnesota State college or university, and to many other schools in and out of the state. **For more information visit mntransfer.org.**

More BHS students are taking college level classes and earning college credit

*Colleges rarely allow 9th grade students in their classes.

**Class offerings were down overall during the COVID-19 pandemic.

Buffalo High School Students Are Ready for College and Careers

Start the Process to Fulfill General Education College Requirements Early

Through the MnTC, students can fulfill many of the general education requirements required at most universities. By completing courses in the ten goal areas, students can graduate from BHS with nearly all the general education requirements for a four-year university.

The ten goal areas include: Communications, Critical Thinking, Natural Sciences, Mathematics and Logical Reasoning, History and the Social and Behavioral Sciences, Humanities and Fine Arts, Human Diversity, Ethical and Civil Responsibility and People and the Environment

Earn College Credits with Advanced Placement Classes

BHS offers Advanced Placement (AP) classes in Calculus A/B, Calculus B/C, Music Theory and Computer Science A. AP classes help students gain the skills and study habits they need to be successful in college. Students can earn college credit, which is nationally recognized and accepted by taking a standardized AP test in the subject area. The test score and the accepting college institution determine the number of credits a student can earn.

Get a Head Start on Your Career Path

A two-year degree offers many opportunities. Students can often land in-demand, high-paying jobs. To expand our students' opportunities, BHS is partnering with Hennepin Technical College and North Hennepin Community College to promote student options in career-focused subjects such as agriculture, business and technical education. Without ever leaving the building, students earn technical college credits to help them graduate career-ready.

Gain Exposure to Careers and the Career Pathways

BHS offers a variety of opportunities for students to learn about different careers that can lead to rich and rewarding careers in all the MN Department of Labor's Career Pathways.

- Annual Career Exploration and Job Fair
- Opportunities in On the Job Training and Apprenticeships
- AVID Program
- Specialized classes at Wright Technical Center-

Choose From These College-Level Classes at BHS

Students might choose a college path in sociology, statistics or math. Or, they might choose a career path and focus on entrepreneurship, auto service or child development. The sky's the limit!

Anoka Ramsey Community College Intro to Statistics

Intro to Public Speaking
Spanish IV & V
Writing & Critical Reading

These college course credits, although offered through specific colleges and universities, are generally transferable to other higher education institutions, even those in other states. Find out more at transferology.com.

“I would absolutely keep this program for as long as possible. I am the only one out of very many college students that I have talked to that had this kind of curriculum. It is a major advantage to my education path. ”

—David N. 2021 BHS graduate, University of MN - Twin Cities,
Political Science

In 2020-21,
students earned
more than 4700
college credits, saving
families nearly
\$1.38 MILLION!

Plan Ahead

We encourage you to meet with your Buffalo High School counselors to map out your studies beginning in 9th grade. Please contact your BHS counselor by calling the Student Services Office at 763-682-8067:

Transfer Your Credits

To transfer their CIS college course credits, graduating high school seniors should request the granting college to send an official transcript to the student’s college of choice. For example, if a student completes CIS Human Anatomy and earns college credit, that student would visit St. Cloud State’s website to request an official college transcript.
